EDUCATION

**High School, Phichai School,
Thailand, Uttaradit**

Sciences – Mathematics Program

2016 – 2019

**Bachelor's degree, Naresuan University,
Phitsanulok, Thailand**

Bachelor of Computer Engineering

GPA : 3.41 Second-Class Honors

2019 – 2023

SKILLS

Stack & Programming

- HTML
- CSS
- TypeScript
- PHP
- SQL

Framework & Database

- Angular
- Tailwind css
- React
- Express.js
- NodeJS
- TypeORM
- MySQL

tools

- Git
- Postman
- Figma
- Trello

Soft Skills

- Communication skill
- Open-mindedness and adaptability
- Time Management

Languages

- English (Basic)

PROFILE

I am a recent Computer Engineering graduate and have senior project experience focused on web applications. This project involves working with the SFIA Competency Profile System version 8, which is designed to analyze skills. Assess personal potential By comparing with international standards.

I am looking for a career as a Frontend Developer and aim to improve my coding skills and productivity in this field.

In addition to technical skills I also strive to strengthen problem-solving abilities and promote effective collaboration within teams. My long-term ambition is to succeed in the programming field and further develop my career.

EXPERIENCE

Paiduaykanmai Co., Ltd.

Apr 2023 – Jun 2023

Software Tester Intern

For this internship, I have trained about Software Tester, including software system testing, divided into Manual Testing and Automated Testing.

Responsibilities

- Authored comprehensive Test Scenarios and Test Cases to ensure thorough coverage of Nest8 and Savety systems.
- Conducted weekly tests to evaluate the overall functionality of both Nest8 and Savety systems.
- Implemented Automation Testing using Cypress to enhance efficiency and accuracy in the testing process.
- Collaborated within an Agile framework, adapting to iterative development cycles and ensuring quick response to changing project requirements.

Project Experience

Jul 2023 – Dec 2023

SFIA Version 8 Competency Profile System

SFIA Version 8 is a system that helps analyze skills. own potential according to international standards I am part of the team developing the system. throughout the development period I helped the team Plan work and solve problems that arise so that they are successfully completed.

Responsibilities

- Designed user interfaces and optimized user experience for desktop,tablet and mobile devices
- Developed and implemented the frontend code based on user interface design
- Write an API for connecting between applications and connect frontend to backend is by using RESTful API communication.
